DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 2, 6, 9 and 11-13, drawn to a process for preparing arrays of heterogeneous catalysts, classified in class 435, subclass 7+.
- II. Claims 3-4, drawn to a process for preparing arrays of heterogeneous catalysts employing precipitation aids, classified in class 435, subclass 7+.
- III. Claims 5, drawn to a process for preparing arrays of heterogeneous catalysts employing dry porous catalyst supports, classified in class 435, subclass 7+.
- IV. Claim 7, drawn to a process for preparing arrays of heterogeneous catalysts employing gasified chemical elements, classified in class 435, subclass 7+.
- V. Claim 8, drawn to a process for preparing arrays of heterogeneous catalysts employing pulverulent chemical elements, classified in class 435, subclass 7+.
- VI. Claim 10, drawn to a process of determining the activity, selectivity and /or long term-stability of

Art Unit: 1639

the catalysts in an array, classified in class 435,
subclass 7+.

The inventions are distinct, each from the other because of
the following reasons:

Inventions I-V and VI are unrelated. Inventions are
unrelated if it can be shown that they are not disclosed as
capable of use together and they have different modes of
operation, different functions, or different effects (MPEP §
806.04, MPEP § 808.01). In the instant case the different
inventions are drawn to different methods using different
components and/or steps that produces different results/
compounds with different effects and/or functions. For example,
the method of Group I is drawn to a process for preparing arrays
of heterogeneous catalysts without using precipitation aid as
recited in Group II. Group VI relates to a screening process.

Because these inventions are distinct for the reasons
given above and have acquired a separate status in the art
because of their recognized divergent subject matter, and the
search required for Group I is not required for Groups II-VII,
specifically the literature searches, restriction for
examination purposes as indicated is proper.

Applicant(s) is/are advised that the reply to this
requirement to be complete must include an election of the

Art Unit: 1639

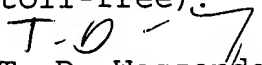

invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant(s) is/are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
